SUMMARY

I am a Full-Stack Web Developer with professional experience since 2022, delivering complete web solutions from frontend design to backend architecture. As a freelancer, I've built and maintained responsive, user-friendly applications using technologies like JavaScript, React, Node.js, SQL, and PostgreSQL. I have a strong understanding of RESTful APIs, database modeling, and modern development workflows. I'm passionate about clean, maintainable code and enjoy solving complex problems through scalable, efficient solutions.

EXPERIENCE

Freelance Web Developer

Self-employed

January 2023 - Present, Remote

- Delivered over 6 successful client projects on time and within budget.
- Engineered scalable RESTful services with Node.js, Express, and MongoDB across 6 client projects over 18 months, increasing site reliability and supporting up to 20,000 monthly users.
- Directed end-to-end web application delivery using Node.js, Express, and MongoDB for 6 Tunisian clients over 18 months, achieving 100% project launch success and maintaining sub-300ms API response times.
- Upgraded client websites by integrating payment gateways and implementing secure authentication flows, elevating user trust and facilitating seamless online transactions.
- Integrated advanced analytics dashboards using Chart.js and Google Analytics, enabling real-time user behavior tracking for 6 client platforms, which led to data-driven improvements and a 30% increase in customer engagement within 12 months.
- Streamlined CI/CD workflows using GitHub Actions and Docker across 6 web application projects, reducing deployment errors by 85% and accelerating release cycles from weekly to daily over 18 months.

PROJECT

Wealthwave Consulting Website

github.com/Adib-96/wealthwave • June 2025 - July 2025

- Developed a static website for a consulting firm operating in Tunisia and Libya.
- Focused on fast performance and responsive design using Eleventy (SSG) and Tailwind CSS.
- Engineered a high-performance static site leveraging Eleventy and Tailwind CSS, optimizing for rapid load times and seamless responsiveness across devices.

Djerba Vibes

www.djervibes.com/ • May 2025 - July 2025

- Designed and launched a multilingual website to promote tourism on Djerba Island.
- Highlighted attractions and services using clean, responsive layouts built with HTML and CSS.
- Showcased original content, imagery, and layout inspired by local architecture, traditions, and island life.

RoyalLine Ride Finder

www.royalline.fr/ • February 2025 - March 2025

- Created a web platform to help users find the best ride services in Monaco, Nice, and Cannes.
- Used Next.js for server-side rendering, Firebase for authentication and real-time data, and Tailwind CSS for styling.
- Engineered a scalable architecture integrating Next.js, Firebase, and Tailwind CSS, which enhanced search speed and supported seamless authentication for users seeking transportation options across Monaco, Nice, and Cannes.

Gym Management System

github.com/Adib-96/gym_system • December 2024 - February 2025

- Built a desktop application to manage gym members, subscriptions, and attendance.
- Designed a user-friendly interface and implemented QR code-based access using Python and Kivy.
- Integrated automated billing and notification features, streamlining membership renewals and improving administrative efficiency.

EDUCATION

Full-Stack Web Development

Holberton School • Tunis • 2022-2024

Licence in management

Business University • 2017-2019

CERTIFICATIONS

The Complete JavaScript Course

2025

- From Zero to Expert!.
-

SKILLS

Frontend Development: HTML5, CSS3, Sass, Tailwind CSS, JavaScript (ES6+), TypeScript, Eleventy, Next.js, React

Backend Development: Node.js, Express, Firebase (Auth & Firestore), MongoDB, REST APIs

Tools & Technologies : Git, GitHub, Webpack, Vite, NPM, Babel, VS Code, Postman
